Conceptualisation

Creative Restrictions

Everyone has something to trade. | Post expire after a week. | No images anywhere on the app.

Type of Website

My app can be best described as a web-based trading auto-battler platform.

It allows users to have their own team of three shapes that they can use to fight other users' teams. The goal is to upgrade your team from level 1-10 by winning matches. In between matches user's will be able to trade their shapes for other shapes of the same level. At the beginning of the week, the user is given a new team to do the same thing again.

Requirements

- Trading of object (shapes)
 - Catalogue page
- Database storing user's information & user's team
- DB/section storing all shape information (shape, colour, abilities etc.)
- DB/section storing all shape information for trade
- Battle page
- User login / sign-up page
- User dashboard page
- Home page

Conceptualisation - continue

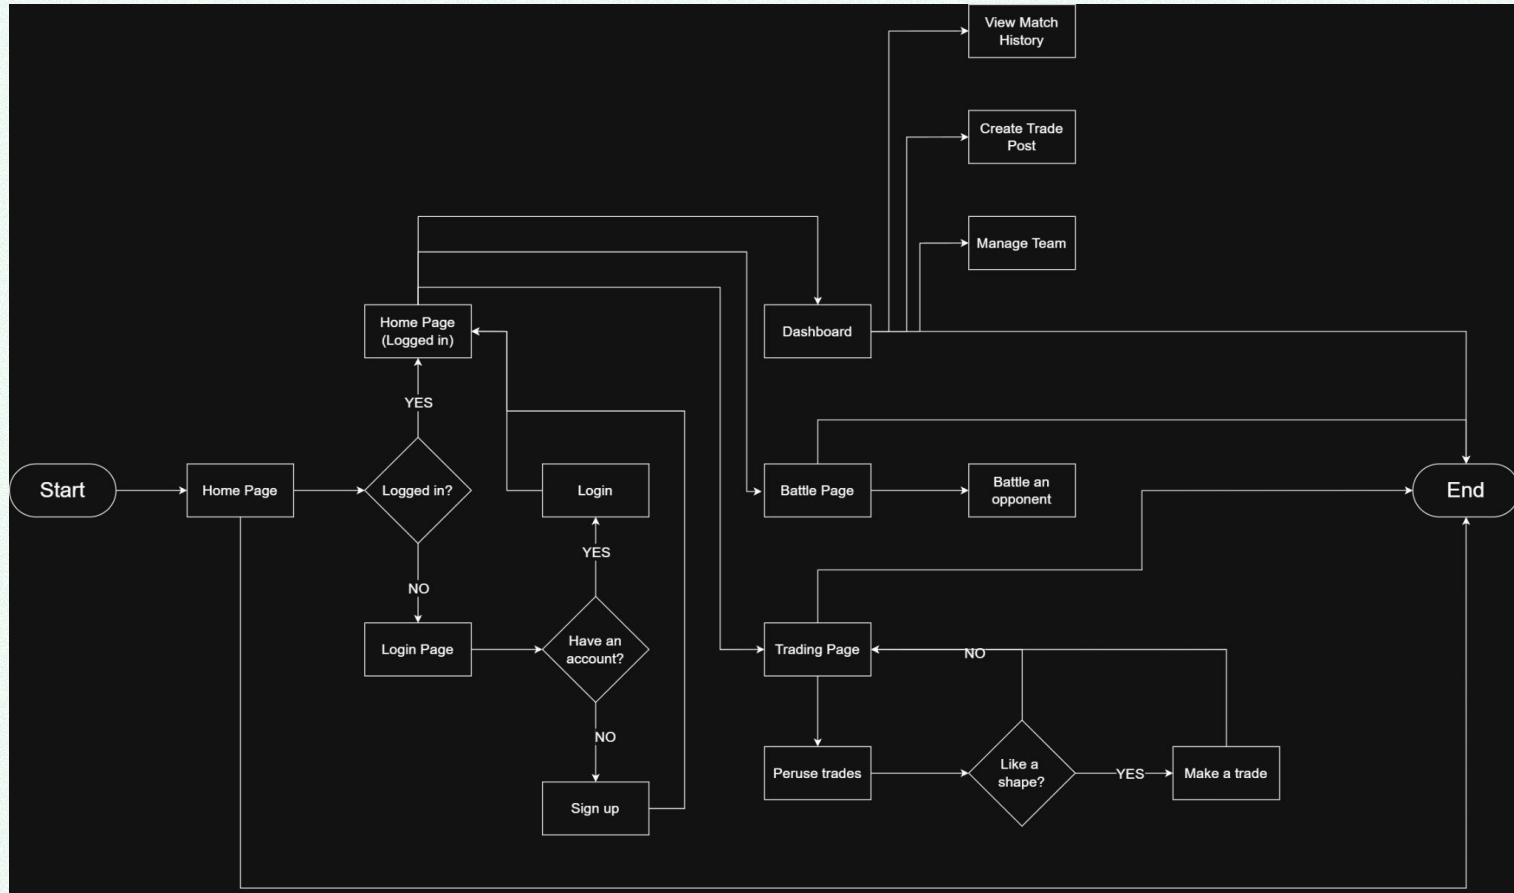

Features

- Users must be able to
 - login / sign-up.
 - manage their team.
 - make trading post and trade shapes. These post must be removed after a week.
 - battle an auto generated team to increase their teams levels.
- The app needs to auto generate teams for users weekly.

Users

Do to the concept delivering a single experience, we truly only have a single type of user. Argument can be made that you could have user's that only battle or only trade however both systems require each other to function properly, thus user will need to partake in both.

Conceptualisation - User Journey

Conceptualisation - Basic Branding

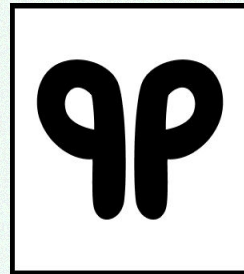

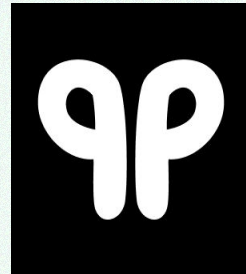

App name

For the app's name I decided to incorporate the auto-battler aspect of the app with the geometric nature of the shapes to form:

POLYPLEX

A simple combination of polygon and suplex.

App Planning - Wireframes - Login

The wireframe shows a login screen for the 'POLYPLEX' app. It features a header with the app's logo and name. Below this is a central 'LOGIN' box containing two input fields: 'Email' (with placeholder text 'Your name here') and 'Password' (with placeholder text 'Your password here'). At the bottom of the login box is a link that says 'Don't have an account? Sign up here'. The entire interface is set against a light orange background with a pattern of darker orange pentagons.

App Planning - Wireframes - Sign-up

The wireframe shows a sign-up form for the 'POLYPLEX' app. The app logo, consisting of a stylized 'pp' in an orange square followed by the word 'POLYPLEX' in orange, is at the top. The form is titled 'Sign-up' and contains six input fields arranged in two columns. The left column has fields for 'Name', 'Email', and 'Password'. The right column has fields for 'Surname', 'Username', and 'Confirm Password'. Each field is a white rectangle with a black border. Below the fields is a link for users who already have an account. The entire form is enclosed in a thick orange border. The background of the slide features a pattern of orange pentagons and decorative pink stars and green circles.
